Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 rejected under 35 U.S.C. 102(b) as being anticipated by Barrett et al. (U.S. Patent 5,336,261).

Barrett et al. disclose a corneal inlay lens having a body form from a material with an index of refraction substantially the same as that of corneal tissue; the body having two surface and joining each other at the periphery of the lens; and the thickness of the edge being less than about 15 micrometers as is claimed (figure 1B and 2A, column 4 lines 55-68 and column 6 lines 1-14, 47-53).

Please note that the invention of Barrett et al. does not teach away from using materials with low refractive index but teach that by reducing the size of the corneal inlay, various materials can be used without adverse side effects cause by using larger lenses.

Response to Arguments

3. Applicant's arguments filed 07/02/2003 have been fully considered but they are not persuasive. In regard to claim 1, applicant argues that Barrett does not disclose the limitation, "material having an index of refraction substantially the same as the corneal tissue". Examiner disagrees because Barrett disclose in column 6, lines 59 and 60 that

Art Unit: 3738

the material that was use had an index refraction of 1.42 to 1.43. The index refraction of 1.42 to 1.43 is clearly "substantially" the same as the index refraction of the corneal tissue. Therefore the rejection under 35 U.S.C. 102(b) as being anticipated by Barrett et al. (U.S. Patent 5,336,261) is proper.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
